Roses, Colchester.

IR, OR MADAM,

We have the pleasure to present you with our New Catalogue of Roses, and take this opportunity of thanking you for your continued patronage, and hope again to be favoured with your order for Roses at an early date; we also respectfully solicit the favour of your recommendation, and assure you that all orders entrusted to us will be executed with the same care and precision which has been exercised in the past.

We devote our whole time and attention to the cultivation of Roses, and therefore can give better value for money than any other firm. We make a special study of all kinds of stocks on which Roses are worked, and are prepared to give our customers the advantage of our experience.

The Summer of 1897 having been so exceedingly dry here, the new Roses of 1895 and 1896 have not been seen at their best, but we have seen fine flowers of the following sorts, and we strongly recommend them :—

Charlotte Gillemot, H.T.	Marjorie, H.T.	Souv. de Mad. Eugenie Verdier, H.T.
Francis Dubreuil, T.	Mrs. W. J. Grant, H.T.	Souv. de President Carnot, H.T.
Hellen Keller, H.P.	Princess Bonnie, H.T.	Sylph, T.
Mad. Abel Chatenay, H.T.	Tom Wood, H.P.	

Our Standard and Half-Standard Roses are grand bushy plants, growing on light, gritty soil. The roots will be very fibrous and numerous, and will transplant far better than those grown on stiff, loamy soils. Our Dwarfs are the strongest and best we have ever had the pleasure to offer to our customers. The wood is so thoroughly ripened that they must give every satisfaction.

Our Export Trade to America, Russia, India, Japan, Ceylon, New Zealand, and all over Europe steadily increases, and reports from Customers in these distant parts continue to be most encouraging. The last week in October or early in November is the safest time to ship Roses for these parts, and **we take all risk of delivery.**

We endeavour to treat our Customers liberally, and when the choice of sorts is left to us, the best and most suitable are sent, and are charged at a low rate. Those who are not acquainted with the **manners and customs** of each rose, will obtain far better results by leaving the selection of sorts to us, simply stating the quantity required, position and soil in which they are to be planted. **Good Standard Roses are scarce, but we have a very large stock of magnificent plants.**

FRANK CANT & Co.

FREE CARRIAGE—All orders to the value of £5 and upwards will be delivered Carriage Paid to any Railway Station in the United Kingdom. Orders to the value of £3 to any Railway Station in England, and orders to the value of £1 to any Station on the Great Eastern Railway. We do not, however, pay carriage on Pot Roses in baskets, but add extra plants to compensate for the Railway charges on them.

HINTS ON GROWING ROSES.

ARRIVAL OF PACKAGE.—So soon as the package containing the Roses arrives it should be taken to some sheltered place to be carefully unpacked. The plants should be taken from their bed of straw, and the roots and tops thoroughly sprinkled with water. Should the weather be wet, and the soil unfit to receive them, it is best to open a trench, lay the roots of the plants in thickly, and cover them well with earth until the weather is fine and the soil sufficiently dry to tread upon. Standard or Dwarf Teas may be left in this position until March, before planting them in their permanent quarters. If the operation of planting is being performed during a drying wind or sunny day, it will be advantageous to the plants before removing them from the shed in which they were unpacked to dip their roots into a pail of thick puddle, composed of loam (or any adhesive soil) and water, two or three times. By this operation the small fibrous roots will be covered with a coating sufficient to protect them from the most searching winds. Assuming that the ground has been previously put in order to receive them, follow then the instructions for planting.

DELAY OF PACKAGE.—If the package of roses should be delayed on the rail for more than a week, it is possible some of the plants may have become shrivelled, in which case they should be buried at once in a trench about six inches deep, and covered entirely with earth. Water them liberally, and allow them to remain under the earth three or four days, they will then be re-charged with sap, and quite ready to plant in their permanent quarters. Our roses are so thoroughly well packed that under ordinary circumstances they will take no harm if delayed ten days or even longer. Those intended for foreign countries require special packing.

SITUATION.—A place apart from other flowers should be assigned to them, if possible sheltered from high winds, but open and not surrounded by trees, as closeness is very apt to generate mildew. Where they cannot have a place to themselves, any part of the garden best fulfilling these conditions will answer.

SOIL.—That which they especially delight in is a rich unctuous loam, that feels greasy when pressed between the fingers; where this is not to be had, the soil should be improved—if light, by the addition of loam (not clay) well worked in; where heavy, good drainage and the addition of coal ashes in small quantities will help it, but in such soils drainage is most important.

PLANTING.—This should be done in the latter part of October or November, but may safely be continued until March. If a bed of Roses is required, it is necessary that the soil be dug 18 inches deep, mixing in plenty of manure with it. If planted with standards, they should be planted about two-and-a-half feet apart, and will require to be securely staked to prevent the winds from moving them. If planted with dwarf roses, I would recommend what is called "pegging down." In the spring short shoots should be cut back to about three eyes, the longer ones bent down in the shape of a bow, and kept in that position by means of a crotch stick which should be inserted tightly in the ground, the shoot being placed under the crotch. Plants treated in this manner form levelly objects, producing masses of bloom all through the summer, and should be planted from one-and-a-half to two feet apart. Of course this applies to the strong-growing varieties. Great care should be taken not to plant too deeply. The roots of standards should be about five inches below the surface. The roots of dwarf roses should be planted so that the union of the bud with the stock is one inch below the surface. Do not put the manure on the bare roots, but first shake some fine mould over them, then mix plenty of manure with the remaining soil, fill it in, TREAD FIRMLY, and lay some long litter on the surface round the plant as a protection from frost.

MANURING.—Roses are gross feeders, and require a quantity of manure. Cow manure is admitted to be the best, but when this is not procurable either pig or stable manure is a good substitute. It is best to apply a surface dressing in the autumn for protection against frost, which should be forked or hoed in, in the early spring. Liquid manures should not be applied to newly-planted roses.

PRUNING.—This should be done during March, sometimes the early and sometimes the latter part of the month. All strong growers should be cut back to about seven eyes (unless planted as dwarfs), when the above-named treatment should be exercised. The weaker and shorter-growing varieties must be pruned closely, only leaving about two or three eyes. In all cases it is necessary to cut away dead, weak, and unripe wood, leaving only the strong and well-matured, which should always be shortened. To produce well formed plants, great care should be taken to leave the top eye pointing outwards, giving the plant room to expand.

WATERING.—Should the spring and summer prove very dry, watering is most necessary, and all fresh-planted Roses will require to be well saturated once a week with water which has been exposed to the action of the air. If larger flowers are required water with diluted liquid manure.

INSECTS are troublesome to the rose grower, and great care and precaution are necessary to prevent their ravages. In spring, as soon as the plant begins to grow, we find the young leaves curl and stick together; these should be untolded, where will be found a small maggot which feeds on the young leaves, and would if not destroyed eventually eat the bud and spoil the flower. After this, the green fly will appear, the only remedy for which is a solution of Quassia chips and soft soap; four ounces of the former should be boiled fifteen minutes in a gallon of soft water, then strained, and whilst cooling four ounces of the latter dissolved in it. To this may be added two gallons more of soft water, and it will then be strong enough to apply with a syringe or brush. Avoid using it during bright sunshine.

STOCKS FOR ROSES.—For Standards and Half-Standards we use the common Dog Briar; for Dwarf H.P.'s the Briar Cutting, Seedling Briar, and the Manetti Stocks; for Dwarf Teas and Noisettes the Briar Cutting and Seedling Briar Stocks; when the selection is left to us, we send Roses budded on the Stock on which we have found from long experience and careful observation they best succeed.

Windsor Castle

July 2/95

Lord Edward Pelham Clinton

Master of the Household, is desired

by the Queen to convey Her

Majesty's thanks to Messrs. G. Cant.

& Co for the beautiful roses sent

by them from the Flower Show

held at Windsor on the 29th

June

Frank Cant & Co.

WE have determined to distribute the following new rose in November, 1897, when strong Ground Plants will be offered at 10/6 each.

Mrs. Frank Cant, H.P.

This is a charming new rose, distinct in every way from all others. Its colour is a beautiful clear pink, the edge and back of petals silvery white, while the base of the petals are fully two shades deeper in colour.

The flowers are large, very full, perfectly formed, and produced abundantly, every shoot bearing a flower. Its habit of growth is erect and vigorous. Not only is it a valuable exhibition rose, but also one of the finest pot Roses in cultivation.

Exhibited before the Royal Horticultural Society, it gained "an award of merit."

Exhibited at the Crystal Palace, National Rose Society show—"card of commendation."

OPINIONS OF THE PRESS.

A certificate was awarded to Messrs. Frank Cant and Co., for their fine new H.P. rose, *Mrs. F. Cant*, a bright blush form that appeared to merit a medal.—From *Gardeners' Magazine*, July 10th, 1896.

Rose Mrs. Frank Cant.—A beautiful new H.P. rose that, by reason of its lovely tint of rose-pink, its delicate fragrance, and good habit, will certainly become popular. It is the result of crossing *Gabriel Luizet* with *Baroness de Rothschild*, and several flowering plants were shown by the raiser. In colour the flowers somewhat resemble those of *La France*. A.M., R.H.S., May 5th. Messrs. Frank Cant and Co., Braiswick Nursery, Colchester.—From *Gardeners' Magazine*, May 9th.

Rose Mrs. Frank Cant (Frank Cant and Co.).—This rose was raised from seed, obtained from a crossing of *Madame Gabriel Luizet* and *Baroness Rothschild*. The habit is splendid, while the soft pink colour of the flowers is very charming (award of merit).—*Journal of Horticulture*, May 7th.

A New Seedling Rose.—*Mrs. Frank Cant*, which was given an award of merit at the Royal Horticultural Society on Tuesday last, is the first seedling raised by Mr. Frank Cant, of Colchester, from a cross made between *Baroness Rothschild* and *Madame Gabriel Luizet*. The seedling, judging from a group of plants shown, is sturdy in growth, with bold leafage and plenty of large, finely-shaped silvery pink flowers delicately, if not strongly, scented. It reminds one of *Baroness Rothschild*, but is distinct. Evidently it will make an excellent pot rose, and should be of great value in the garden.—*Gardening Illustrated*, May 9th, 1896.

Climbing Rubens, T.

We are much disappointed in this rose; such a large percentage of the plants revert to the old dwarf variety that we do not feel justified in offering it for sale this year.

We are so frequently asked by Customers to **mark** the roses in our Catalogue which we **most strongly recommend for general cultivation**, that we have decided to publish a list of 72 varieties most suitable for garden ornamentation. These are all **strong growers, free and continuous bloomers, perfectly hardy**, and will succeed in almost any situation.

Those who wish to grow Standards or Half-standards cannot do better than select the sorts marked S. These we can strongly recommend for general garden ornamentation.

Those who require the best **exhibition varieties** will find them in the body of the Catalogue, marked with an asterisk (*).

The following 72 varieties can be supplied in fine, well-grown dwarf plants for £3. Three plants of each £7.

Abel Carrière	S Dupuy Jamain	S Marehioness of Lorne
Alfred Colomb	S Ernest Metz (T.)	Margaret Dickson
Alphonse Soupert	S Francisea Krüger (T.)	Marie Finger
S Anna Olivier (T.)	S Gèneral Jacqueminot	S Marie Van Houtte (T.)
Auguste Rigotard	S Gloire de Dijon	Merveille de Lyon
S Augustine Guinoisseau (H.T.)	Gloire Lyonnaise (H.T.)	S Mrs. George Dickson
S Baroness Rothschild	S Grace Darling (H.T.)	S Mrs. John Laing
S Boule de Neige	Gustave Regis (H.T.)	S Mrs. Paul (B.)
Camille Bernardin	S Heinrich Schultheis	Mrs. R. G. Sharman Crawford
S Captain Hayward	S Homere (T.)	S Perle des Jardins (T.)
S Camoens (H.T.)	Jeannie Dickson	Pride of Waltham
S Caroline Testout (H.T.)	Kaiserin Augusta Victoria (H.T.)	S Prince Camille de Rohan
S Celine Forestier (N.)	S La France (H.T.)	Rubens (T.)
S Charles Lamb	S Lady Helen Stewart	Safrano (T.)
S Charles Lefebvre	S L'Idéal (N.)	Senateur Vaisse
S Clio	S Madame Bérard (T.)	S Souvenir de la Malmaison (B.)
S Comte de Raimbaud	Mdme. Chodane Guinoisseau (T.)	S Souvenir de S. A. Prince (T.)
Countess of Rosebery	S Madame de Watteville (T.)	S Souvenir d'un Ami (T.)
S Crown Prince	S Madame Falcot (T.)	Suzanne Marie Rodocanachi
Dr. Andry	S Madame Gabriel Luizet	S Ulrich Brunner
Duke of Connaught	S Madame Isaac Pereire (B.)	S Viscountess Folkestone (H.T.)
S Duke of Edinburgh	S Madame Lambard (T.)	S Victor Hugo
S Duke of Teck	S Madame Victor Verdier	S Wm. Allen Richardson (N.)
Duke of Wellington	S Maman Cochet (T.)	S Laurette Messimy (C.)

Four dozen Standards from the above £4.

We also give a list of the best Climbing Roses for walls, or sheltered arches and bowers.

Bouquet d'Or (T.)	Madame Alfred Carriere (H.N.)	Reve d'Or (N.)
Climbing Devonensis (T.)	Madame Bérard (T.)	Reine Olga de Wurtemberg (H.T.)
Climbing Niphetos (T.)	Maréchal Niel (N.)	Claire Jacquier (Poly.)
Climbing Perle des Jardins (T.)	Reine Marie Henriette (H.T.)	Crimson Rambler (Poly.)
Gloire de Dijon (T.)		The Garland (P.)

The above fourteen varieties can be supplied in strong, well-grown plants for 15/-.

These are special prices, and subject to no discount.

◇ PRICES OF ROSES ◇

WHEN THE SELECTION OF SORTS IS LEFT TO **FRANK CANT & Co.**

Standard roses are from 3ft. to 4½ft. high. Half-standards are from
1½ft. to 2ft. 9in. high.

	<i>Per doz.</i>	<i>Per 100.</i>
STANDARD AND HALF-STANDARDS, an extra good assortment, and very fine plants.....	18/- to 21/- ..	£7
STANDARD AND HALF-STANDARD, TEAS, AND NOISETTES, very fine heads and the best sorts	21/- to 24/- ..	£8
DWARF STANDARDS on stems about 1ft. to 15in. high, best sorts, and free bloomers, from.....	12/- to 15/- ..	£5
DWARF (or bush) H.P.'s, fine plants on briar-cutting or seedling briar	9/- ..	£3
DWARF (or bush) H.P.'s, best sorts, and extra fine plants on Manetti	8/- ..	£2/10/-
DWARF (or bush) TEA AND NOISETTE, on briar only, all the very best sorts.....	12/- ..	£4 to £5

We can supply roses on their own roots, but we do not recommend them; they do not flower so freely, and are much longer making plants.

Purchasers of 100 or more roses who select their own varieties will be allowed 10 per cent. Discount off individual Catalogue Prices for Cash.

PARCEL POST.— Small parcels of Dwarf Roses can be forwarded through this medium with perfect safety, and for long distances much cheaper than by rail. We will forward twelve first-class plants, **OUR OWN SELECTION** of sorts, package free and postage paid, for 8/-.

Cash or references must accompany orders from unknown correspondents.

✧ NEW ROSES OF 1897. ✧

The descriptions are those given by the raisers.

Dwts.

- 2/6 **Anna Chartron** (T.), (*Vve. Schwartz*), growth vigorous, flowers large, full, and well formed, bud very long and nicely pointed; colour cream, bordered with bright carmine and rose; very floriferous.
- 2/6 **Catherine Gerchen-Freundlich** (T.), (*Ketten*), growth vigorous, flowers large and full; colour rose marbled red, passing to crimson on borders of petals.
- 2/6 **Chateau d'Ourout** (T.), (*Ketten*), growth vigorous, flowers very large and full; colour dark carmine red, exterior of petals mauve.
- 7/6 **Climbing Kaiserin Augusta Victoria** (H.T.), (*A. Dickson*), a climbing sport of great vigour, identical in every respect (growth excepted) with the normal type. This will prove to be the most valuable addition to the climbing section since the introduction of *Marchal Niel*.
- 7/6 **Countess of Caledon** (H.T.), (*A. Dickson*), this is a magnificent variety of undoubted merit, alike useful for exhibition or decorative purposes. It is of vigorous growth and free-branching habit, flowering in great profusion throughout the entire season. The blooms are large, of great substance, and perfect form, with large, stout petals; colour rich carmine rose; splendid. Gold medal N.R.S., Crystal Palace, 1897.
- 2/6 **Duc de Caylus** (T.), (*Vve. Schwartz*), growth vigorous, flowers large, full, and of good form; colour dark rosy magenta, suffused cream and canary yellow; petals large.
- 5/- **Duchess Marie of Ratibor** (T.), (*P. Lambert*), growth strong and upright; flowers very large, full, and regularly shaped, keeping a long time in good condition; colour creamy yellow, centre reddish crimson with yellow; lovely shade; very fine.
- 5/- **Emanuel Geibel** (T.), (*Hedlund-Lubeck*), a sport from *Madame Falcot*, much better and darker colour than the parent; full; very good.
- 2/6 **Emilie Gonin** (T.), (*Guillot*), growth vigorous; flowers very large and full; colour white, tinted orange yellow; the petals, which are large, are bordered with rosy carmine; superb. Awarded gold medal, Lyons, 1895.
- 7/- **Empress Alexandra (of Russia)** (T.), (*Wm. Paul and Son*), rich lake red, shaded with orange and fiery crimson; very large, full, and globular; of vigorous growth.
- 5/- **Frau Geheimrat Von Boch** (T.), (*P. Lambert*), growth strong and bushy, flowering continuously from June to November; flowers large, full, well-formed, with large, wide petals; buds long; colour creamy gold, backs of outer petals carmine at times.
- 2/6 **Ferdinand Batel** (H.T.), (*Pernet-Ducher*), growth vigorous; flowers large, very full, oval; colour varying from pale rosy flesh on a ground of yellow nankeen to yellow nankeen orange.
- 2/6 **Ferdinand Jamin** (H.T.), (*Pernet-Ducher*), growth very vigorous; flowers large, full, globular; colour rosy carmine, shaded salmon; very fine. "This variety has flowered here, and is certainly promising."
- 2/6 **General Billot** (T.), (*Dubreuil*), growth very vigorous; flowers large; colour pale violet; amaranth reflex of petals crimson; beautiful.
- 5/- **Grand Duchess Victoria Melita** (H.T.), (*P. Lambert*), growth very strong, flowering with the greatest freedom throughout summer and autumn; flowers large and full, buds long; always opening well; colour creamy white, with light gold centre; like *Kaiserin Augusta Victoria*.
- 5/- **Gruss an Teplitz** (H.T.), (*Geschwind*), growth strong; flowers large, full, and of beautiful cup-shape; colour brightest scarlet crimson; very free flowering; first-rate.

- Dwfs.
- 2/6 **Imperatrice Alexandra** (T.), (*Leveque*), growth very vigorous, flowers large and full; colour clear copper yellow, slightly shaded rosy carmine and peach.
- 2/6 **Jeanne Forgeot** (T.), (*Forgeot-Tardy*), growth very vigorous and floriferous, flowers large and full; bud very long; colour at edges yellow, centre golden yellow, shaded rose and mauve.
- 2/6 **Josephine Dauphin** (T.), (*Liabaud*), growth vigorous, flowers large, with round petals, buds very long; colour white, tinted yellow.
- 5/- **Lilliput** (Polyantha), (*Paul and Son*), a good addition to the dwarf miniature roses, producing bunches of small rosette-shaped flowers; bright cerise carmine, flushed with crimson; distinct in colour; very free and perpetual.
- 2/6 **Madame Cadeau-Ramey** (H.T.), (*Pernet-Ducher*), vigorous growth; flowers large, full, and of perfect form; colour rosy flesh, shaded with yellow at the base, and bordered with rosy carmine; very beautiful.
- 2/6 **Madame Louis Gravier** (T.), (*Gamon*), growth vigorous; flowers large, very full; colour light salmon, tinted orange yellow, bordered rosy carmine; very beautiful.
- 2/6 **Madame Jules Grolez** (H.T.), (*Guillot*), growth vigorous; flowers large, full: colour beautiful bright China rose; extra.
- 7/6 **Miss Ethel Richardson** (H.P.), (*A. Dickson*), this superb rose is thoroughly distinct from anything extant. It is of moderate growth and free flowering habit. The flowers are of very large size, imbricated form, with high centre; the petals large, smooth, and slightly reflexed; colour almost pure white, with pale flesh centre.
- 5/- **Oskar Cordel** (H.P.), (*P. Lambert*), very strong, growth and foliage like *Merveille de Lyon*; flowers very large, full, cup-shaped; colour bright carmine, very rich; sweetly scented, and free flowering. A splendid exhibition rose.
- 2/6 **Perle des Rouges** (Polyantha), (*Dubreuil*), growth dwarf and bushy; flowers medium size, very full; colour velvety crimson, with reflex of petals bright cerise; very pretty variety.
- 2/6 **Preciosa** (H.T.), (*Vieweg*), flowers dark velvety red, large, very full; growth robust, and very floriferous.
- 2/6 **Raoul Chauvry** (T.), (*Chauvry*), growth vigorous and erect, flowers large and double, buds very long; colour yellow, shaded apricot.
- 5/- **Rev. Alan Cheales** (H.P.), (*Paul and Son*), very large peony-shaped rose of extraordinary novelty and beauty of colour; a pure lake, with reflexed silvery white shaded back petals; very vigorous and free.
- 7/6 **Robert Duncan** (H.P.), (*A. Dickson*), another very distinct and fine hybrid perpetual: of vigorous growth; flowering abundantly. The blooms are large, perfectly formed, and of good substance; petals large and shell-shaped; colour bright rosy lake.
- 2/6 **Souvenir de Jeanne Cabaud** (T.), (*Guillot*), growth vigorous; flowers large: colour copper, centre apricot yellow and carmine; very pretty. "We consider this promising."
- 2/6 **Souvenir de Madame Camusat** (H.T.), (*Bonnaire*), growth robust: flowers large, very full; colour rosy flesh, reflex of petals lighter.

THREE THINGS MOST ESSENTIAL TO SUCCESSFUL ROSE CULTIVATION—

FIRST.—Buy good, strong, young plants of free growing sorts with plenty of fibrous roots, and if dwarfs, on briar budded close to the root to enable fleet planting.

SECOND.—Manure and dig the beds quite a fortnight before planting the Roses.

THIRD.—Tread the soil firmly after planting, and rake the surface to fill up foot-prints and holes.

THINGS TO AVOID—

DO NOT buy rubbish because it appears cheap.

DO NOT plant more than an inch deeper than the trees have been planted before.

DO NOT put raw manure directly on the roots of roses or expose the roots to drying winds.

Lord Penzance's Hybrid Sweet Briars.

These wonderful single roses, raised by Lord Penzance, have already obtained a world-wide reputation, and are very popular. Like their parent (sweet briar) both foliage and flower are deliciously fragrant, they are all strong growers, free bloomers, and perfectly hardy. The flowers are single, but lasting. Extra strong plants, 4 to 6 feet high, 2/- each. These require no pruning, and make impenetrable hedges of great beauty.

Dwts.

- 1/- **Amy Robsart** (*Keynes & Co.*, 1894), lovely deep rose; the buds before opening are most graceful, of Sweet Briar type; an abundant bloomer; robust and free.
- 1/- **Anne of Geierstein** (*Keynes & Co.*, 1894), dark crimson, followed by an abundance of pretty clustered bunches of hips; large foliage: good grower, and graceful branching habit.
- 1/- **Brenda** (*Keynes & Co.*, 1894), maiden's blush or peach, dainty in colour and shade, the contrast and effect of the bright golden anthers add peculiar charm to this variety.
- 2/- **Catherine Seyton** ... a very pleasing tint of soft rosy pink, the bright golden anthers being very prominent; very free flowering perpetual, and a good autumnal.
- 2/- **Edith Bellenden** pale rose, flowering profusely in clusters at the ends of the shoots, which are long and pendulous.
- 2/- **Green Mantle** bright rich pink, with a band of white encircling the anthers, which, with their back ground of white, have a very pretty effect. This variety, too, is very free flowering, and a good autumnal.
- 2/- **Jeannie Deans** semi-double; very large scarlet crimson; flowering freely in clusters; foliage of a deep healthy looking green, and very strong growing.
- 2/- **Julie Mannering** soft pearly or porcelain pink, the prettiest of all the pink varieties; very free flowering, thoroughly perpetual, with flower and foliage deliciously scented.
- 1/- **Flora McIvor** (*Keynes & Co.*, 1894), pure white, blushed with rose; perfect for cutting; large flowers; graceful in growth and habit, a gem.
- 1/6 **Lady Penzance** (*Keynes & Co.*, 1894), beautiful soft tint of copper with a peculiar metallic lustre, the base of each petal being a bright yellow; free flowering, with a delicious perfume from foliage and flower.
- 1/6 **Lord Penzance** (*Keynes & Co.*, 1894), soft shade of fawn or *ceru*, passing to a lovely emerald-yellow in the centre, sometimes toned with a delicate pink; a good grower and abundant bloomer, very sweet scented.
- 1/- **Lucy Ashton** (*Keynes & Co.*, 1894), pretty white blooms with pink edges; wonderfully free flowering; free grower, with erect shoots and foliage as sweet as the old Sweet Briar.
- 2/- **Lucy Bertram** a fine deep crimson, the richest colour of all, the centre is pure white, which shows off the bright yellow anthers to good advantage; branching habit; free flowering; a good autumnal.
- 1/- **Meg Merrilies** (*Keynes & Co.*, 1894), gorgeous crimson; very free flowering; seeds abundantly; has a wonderfully robust habit, large foliage; one of the best.
- 2/- **Minna** large pure white, opening with a tint of palest blush; bushy habit; foliage like a Scotch Briar.
- 1/- **Rose Bradwardine** (*Keynes & Co.*, 1894), beautiful clear rose; perfect in shape; very profuse, strong, robust habit.

One strong plant each of the above for 18/-.

For the convenience of our customers we have placed all hybrid perpetuals, hybrid teas, Bourbons, teas and noisettes in alphabetical order, signifying the classes to which they belong by the letters following each name: T., signifying tea; H.T., hybrid tea; N., noisette; B., Bourbon. This alteration will, we trust, meet the approval of our customers, and will make it much more easy to find any particular name.

The best exhibition varieties are printed in large type, *i.e.*, **Alfred Colomb**.

Those printed in SMALL CAPITALS are mostly good garden roses, and those producing small button-hole flowers.

THE HYBRID PERPETUALS are a very beautiful class of rose. They are perfectly hardy, and cannot be too highly recommended. To those who grow for exhibitions they are indispensable.

TEAS, of which we have a stock of 50,000 plants all on briar stocks, may be called the "fair sex" roses, not because they are more delicate or tender than the hybrid perpetuals, but because the flowers are so delicately-beautiful and refined as to be unrivalled. They are ever-blooming from May to November, and last a very long time when cut. A slight protection in the form of brake or bracken, tucked into the heads of the plants, should be given in very severe weather, dwarf plants may be earthed up like celery; a few degrees of frost will not hurt them. They rarely take mildew, and are absolutely fungus-proof.

A high position and good porous soil suit them best, and undoubtedly the finest flowers are produced on HALF-STANDARDS, whether in the open ground or in pots. They like liberal treatment in manuring, and when planted in masses nothing can be more beautiful.

If large blooms are required for exhibition, teas must be pruned close, leaving only about three eyes on each shoot, but if grown for garden ornamentation very little pruning is required, cutting away only the weakest wood. For this class we prefer good decomposed stable manure.

THE HYBRID TEAS are rapidly increasing, and each year some good novelty is placed before us. These require similar treatment to the hybrid perpetuals. They are, perhaps, the best autumnal bloomers, taking *La France*, *Viscountess Folkestone*, *Caroline Testout*, etc., as the type.

THE NOISETTES are mostly strong growers, adapted for climbing, and many of them worthy of a south wall. They flower in clusters, and should be pruned sparingly. *Maréchal Niel* is the best of this class.

Only those sorts which are priced in the column for standards and half-standards can be had as such this year. THEY ARE VERY FINE PLANTS, BOTH TEAS AND H.P.'s, EQUAL TO ANY WE HAVE GROWN IN IN PAST YEARS.

Our dwarf roses are budded so close to the roots of the stock on which they are worked, that they are as short legged as if on their own roots, being an immense advantage for fleet planting, which we strongly advocate.

◇ CATALOGUE OF ROSES. ◇

As the season advances, customers are respectfully invited to supplement their orders with a few extra varieties, in case the stock of any of the sorts required should have been exhausted; but in no case will the supplementary sorts named be sent, if those first ordered are in stock.

The letter or letters directly following the names of a rose signifies the class to which it belongs—T., signifies tea; N., noisette; B. Bourbon; H.T., hybrid tea.

Abbreviations used:—Vig., denotes vigorous habit of growth; rob., robust habit of growth; mod., moderate habit of growth.

Those varieties marked with a star (*) may be relied on as good exhibition varieties.

Stds. or Half Stds. Dwfs.	NAME.	DESCRIPTION.	Habit of Growth.
1/6 .. -/9	Abel Carrière (<i>E. Verdier</i> , 1875),	crimson maroon with purplish shading; large and full, but rather flat; best of its colour	vig.
— .. -/9	ABEL GRAND (<i>Damaizin</i> , 1865),	silvery pink; bold, half imbricated; early, free flowering, and fragrant	"
— .. 1/-	Acidalie (B.)	colour blush white; large, full flowers, produced abundantly on long, trailing shoots ..	"
2/- .. 1/6	{ *Adam (T.) (<i>Adam</i> , 1833), PRESIDENT	pale blush rose; very free flowering, always good shape	mod.
2/- .. 1/6	ADELINE V. MOREL (N.), (<i>Bernaix</i> , 1891),	pale canary yellow, edge of petals tinted apricot; a charming little button-hole flower	vig.
— .. 1/-	AIMEE VIBERT (N.) (<i>Vibert</i> , 1828),	pure white; open rosette centre, small flowers, produced in clusters; almost evergreen; a good hardy climber	"
2/- .. 1/6	Alba Rosea	(see <i>Madame Bravy</i>).	"

BANKSIAN ROSES.

These have not strong constitutions, and require to be grown on a south wall. The flowers are produced on the weaker shoots, very early, sometimes in April; they require very little pruning.

- .. 1/6 **White** (*Kerr*, 1807) ... white; small and very double; violet scented; quite evergreen; a charming climber
- .. 1/6 **Yellow** (*Royal Horticultural Society*, 1824), yellow; small and very beautiful; double; a profuse bloomer, and quite evergreen

JAPANESE ROSES (ROSA RUGOSA).

These are very strong growers and make large bushes, three to six feet high and as much through them, producing large fragrant flowers in great profusion until late autumn. They bear seed pods of a brilliant scarlet colour, about the size of walnuts, which are remarkably striking and beautiful during the autumn. Partridges and pheasants are very partial to the seeds and pulp of this fruit, and belts of these roses should be planted in all game preserves. They require no pruning, and should be more generally planted in shrubberies. **When six or more of each of these are ordered they will be charged 8/- dozen; cheaper by the 100.**

- .. -/9 **Alba** (*Thunberg*) white, single; very free flowering, and quite hardy
- .. 1/- **America** crimson lake; large open single flowers; the fruit is long, and covered with long spines ..
- .. 1/- **Blanc Double de Coubert** (*Cochet-Cochet*, 1892), with pure white double flowers, a very valuable addition, the best in ..
- .. 1/- **Calocarpa** flowers bright rose, succeeded by rich scarlet fruit. this section
- .. 1/6 **Fimbriata** white fimbriated semi-double flowers, tinted with the palest blush rose; a strong grower; free and continuous bloomer
- .. 1/- **Madame Geo. Bruant** (*Bruant*, 1887), pure white flowers, semi-double; produced abundantly
- .. 3/6 **Rose Apples** (*Paul and Son*, 1896), flowers semi-double, with large petals; colour pale carmine rose; flowering in immense clusters during summer and autumn
- .. -/9 **Rubra** (*Thunberg*, 1802) .. deep rose, shaded violet
- .. 2/6 **Souvr. de Pierre Leperdrieux** (*Cochet-Cochet*, 1896), flowers semi-double, and of bright vinous-red colour; produced in immense clusters

FAST-GROWING CLIMBING ROSES.

Suitable for covering arches and bowers, disfigured walls, etc. They are perfectly hardy, almost evergreen, producing in great abundance small semi-double flowers. They will flourish in any situation, and require very little pruning. Their growth is very long and slender.

Price 9d. each, 7/- per dozen.

	DESCRIPTION.	Habit of Growth.
Alice Gray	flowers white, delicately edged with pink; free blooming, and very strong growing; suitable for arches.

POLYANTHA AND SINGLE ROSES.

The letter directly following the name in this section signifies to what class the rose belongs—P. for polyantha; S., single; H.S.B., hybrid sweet briar.

The polyanthas of dwarf habit produce compact clusters of charming miniature flowers, and are persistent bloomers. They are lovely bedders, and most useful for edgings or borders round beds of the stronger growing H.P.'s and teas. They form charming specimens in pots for conservatory decoration. The single roses in this section are principally suitable to grow as “pillar” or climbers, and are remarkable for their charming single flowers, which are produced in immense quantities.

— ..	2/6	Aglaia (<i>P. Lambert</i> , 1896).	A vigorous climber, with beautiful foliage; flowers in large pyramidal trusses, similar to <i>Crimson Rambler</i> ; colour bright yellow; the flowers are full and about the size of those of <i>Gloire des Polyantha</i> , with a strong tea perfume	very vig.
— ..	1/-	Anna Maria de Montravel	(<i>P.</i>), (<i>Raimbaud</i> , 1879), pure white; perfect little flowers, produced in immense quantities	dwarf
— ..	1/-	Bardou Job (<i>S.</i>), (<i>Nabonnand</i> , 1887),	a brilliant glowing crimson; immense petals; very hardy and most profuse bloomer, one of the most beautiful single roses	vig.
— ..	1/-	Cecile Brunner (<i>P.</i>).	(<i>Ducher</i> , 1880), blush, shaded pale pink; small pointed buds; very free blooming; one of the best.	dwarf
— ..	1/- to 2/6	Claire Jacquier (<i>P.</i>),	(<i>Bernaix</i> , 1888), nankeen yellow; charming little flowers, produced in large clusters; exceedingly pretty for trellis or arches, being a rampant climber.	very vig.
— ..	1/-	Clothilde Soupert (<i>P.</i>),	(<i>Soupert et Notting</i> , 1890), white, shaded pink; perfect shape, free blooming	very free
— ..	3/6	Cooling's Single Crimson Bedder	(<i>H.P.</i>), (<i>Cooling and Sons</i> , 1896), a charming addition to the single and garden roses; quite distinct; semi-dwarf habit; colour glowing crimson; flowers very large and produced in clusters	free

Twenty-four strong well-grown bush plants from this section, our choice of sorts, 18/-.

Stds. or Half Stds. Dwts.	NAME.	DESCRIPTION.	Habit of Growth.
2/6 .. 1/- to 2/6	Crimson Rambler (P.),	(<i>Turner</i> , 1893), a magnificent rose of Japanese origin; the flowers are small and double, produced in largo pyramid shaped trusses, and are the brightest crimson, retaining their colour for more than a week.	very vig.
— .. 1/-	Double Scarlet (sweetbriar),	double flowers freely produced, and sweetly scented as the type.	vig.
— .. 1/-	Etoile d'Or (P.),	(<i>Dubreuil</i> , 1890), citron yellow in the centre, shading to pale chrome yellow; very small, and delightfully pretty	dwarf
— .. 2/6	Euphrosine (P. <i>Lambert</i> ,	1896), a vigorous grower and profuse bloomer; the colour is bright red, half-open buds, brilliant carmine. When fully open the numerous yellow anthers give the flowers a charming effect	very vig.
— .. 1/-	Georges Pernet (P.),	(<i>Pernet</i> , 1888), colour rosy peach, shaded yellow; good grower, very free bloomer; a charming variety	dwarf
— .. 1/-	Gloire des Polyantha (P.),	(<i>Guillot</i> , 1887), deep rose, base of petals almost white; flowers rosette shape; very free blooming	"
— .. 1/-	Golden Fairy (P.),	(<i>Bennett</i> , 1889), bright fawn yellow, edge of petals paler	"

— .. 1/-	Little Dot (P.),	(<i>Bennett</i> , 1889), white, centre salmon pink; very small semi-double perfect flowers, produced in clusters	dwarf
— .. 1/-	Lucida Plena (<i>Veitch</i> ,	1885), a pure rose colour; small double flowers; foliage very handsome and evergreen	very vig.
— .. 1/-	Lucida Single (S.)	... bright rose; beautiful reddish foliage; it flowers freely	"
— .. 1/-	Ma Paquerette (P.),	(<i>Guillot fils</i> , 1875), pure white; rosette shaped flowers, produced in great profusion	dwarf
— .. 1/-	Macrantha (S.)	... the palest flesh colour; large flowers, with golden stamens; this makes a bold shrub	very vig.
— .. 1/-	Madame E. A. Nolte (P.),	(<i>Bernair</i> , 1893), chamois yellow, changing as the flowers open to rosy white; small flowers; very free	dwarf
— .. 1/-	Marie Pavie (P.),	(<i>Alégatière</i> , 1888), pure white, tipped with pale rose; flowers rather large, produced abundantly	vig.
— .. 1/-	Mignonette (P.),	(<i>Guillot</i> , 1881), rosy pink; small and semi-double; a good bedder and very free bloomer	dwarf
— .. 2/6	Mosella (T.P.),	(<i>Lambert and Reiter</i> , 1896), vigorous and very floriferous; colour white, on a clear yellow ground; form of a camelia; very beautiful	
— .. 1/-	Papillon (N.)	... carmine rose, shaded to deeper salmon, a charming colour; flowers small, and produced abundantly	very vig.

Stds. or Half Std.	Dwfs.	NAME.	DESCRIPTION.	Habit of growth.
— ..	1/-	Paul's Single White (S.),	(Paul and Son, 1883), pure white; a free bloomer and vigorous grower.	
— ..	2/-	Paul's Carmine Pillar (S.),	(Paul and Son, 1895), the brightest rosy carmine, flowers produced abundantly. The plant is a very strong grower and continuous bloomer. It is perfectly hardy, and will prove valuable for planting in shrubberies and rosaries for effect. "A charming decorative rose"	very vig.
2/6 ..	1/6	Perle d'Or (P.),	(Dubreuil, 1883), nankoen yellow; pointed bud; an exquisitely pretty little flower; the best of its class.	dwarf
— ..	1/6	Pink Soupert (P.),	(Dingee and Conard, 1895), rosette-shaped flowers; varying in colour from pale pink to red; very fragrant, and produced in extraordinary profusion	"
— ..	1/0	Polyantha Simplex	(from Japan), pure white; single flowers, about the size of a florin; a rampant climber.	
— ..	1/-	Ranuncululus	a strong growing, ever blooming, evergreen rose.	
— ..	1/-	Red Pet (P.),	(Paul and Son, 1888), dark crimson; flat imbricated; fine for bedding	mod. vig.
— ..	1/0	Rosa Alpina (S.)	bright rose; foliage bronzy colour in the autumn; seed pods bright red, pearshapo.	very vig.
— ..	1/6	Rosa Indica (S.)	soft red; ever blooming; not hardy	vig.
— ..	1/-	Rosa Moschata Alba (S.),	flowers white, slightly tinted with pink; a free bloomer, and vigorous climber	very vig.
— ..	1/-	Rosa Moschata Nivea (S.),	white flowers, rather smaller than <i>Alba</i> , with black stamens	"
— ..	-/9	Rosa Polyantha (P.),	pure white single flowers; an immense grower.	"
— ..	1/-	Rosa Pomifera (S.),	blush coloured flowers; producing large scarlet fruit pods in great abundance	"
— ..	1/-	Rosa Rubrifolia (S.),	(Dr. Swainson, 1803), soft rose; stems and foliage of a beautiful red shade	"
— ..	1/6	Rosa Wichuriana ...	single white flowers with yellow stamens; blooms in trusses; long trailing habit	"
— ..	2/6	Thalia (P. Lambert Trier,	1896), in growth, etc., this is similar to <i>Aglaia</i> , only the colour is pure white, and the umbels much larger	"
— ..	1/-	White Pet (P.),	(Henderson, 1879), creamy white; a profuse bloomer; fine for bedding	"

ALL CRIMSON, WITH LONG STALKS	10/- "
ALL PINK	"	12 - "
ALL YELLOW	"	12 - "
ALL WHITE	"	12/- "

ADDRESS FOR TELEGRAMS—"ROSES, COLCHESTER."

WHAT THE PRESS SAYS:

The Evening Standard, of April 11th, in its notice of the Royal Horticultural Society's Show at Westminster, said, "The great surprise of the day was the show of roses by Mr. FRANK CANT, of Colchester, which were superb, and could not be beaten by any cut in midsummer."—Silver Flora Medal

Commenting on the N.R.S. Rose Show at Westminster Drill Hall, *The Daily News*, of June 22nd, said, "Of the several exhibitors, few were more successful than Mr. FRANK CANT, of Colchester, who was first for twenty-four distinct varieties—Teas and Noisettes, and with three trusses each of twelve varieties—Teas and Noisettes. Mr. CANT had some very fine specimens."

The Journal of Horticulture, of April 27th, says of the show at Westminster, April 25th, "The cut roses sent by Mr. FRANK CANT, Colchester, were remarkably fine, and attracted much attention."—Silver Banksian Medal.

The World, of July 2nd, says, "Some of the sulphur and apricot-coloured begonias are magnificent, and are in their way as beautiful as any flower. From them we wander on to the cut roses, and fall helpless victims to the beauty of *Viscountess Folkestone* which is shown amongst Mr. FRANK CANT'S extraordinarily varied assortment of these flowers. From *Viscountess Folkestone* we pass to *Ma Capucine*, a brilliant yellow rose, almost copper in the centre; and then have our choice still further bewildered by *Madame de Watteville*. We feel like the theological student who declined to say which were the major and which were the minor prophets, on the ground of objecting to make invidious distinctions, so we tear ourselves away from Mr. CANT'S roses at the Floral Feast."

A Good Record for Champion Honours.

We have now competed for the
Champion Trophy of the National Rose Society

NINE TIMES,

staging for it for the **FIRST** time in 1887. Since
then we have

WON IT FOUR TIMES,

we have been placed

SECOND for it **FOUR TIMES,**

and **ONCE THIRD**, and in 1891 we were unable
to compete for it owing to the early date of the
show and the lateness of the season. In addition
to the above we have been awarded upwards of

130 Medals,

26 Cups & Pieces of Plate,

and over

**1,100 First and Second
Prizes.**
